

Mastering Knife Skills and Prep Precision

The Proper Pinch Grip

Grip the blade heel firmly between your thumb and index finger for maximum control, balance, and fatigue reduction.

The Guiding Claw

Curl your non-cutting hand into a protective claw with fingertips tucked inward, guiding the blade flat against your knuckles.

Classic French Cuts

Practice uniform batonnet (6mm sticks), julienne (3mm matchsticks), brunoise (fine dice), and chiffonade for herbs.

Board Stability and Safety

Place a damp cloth or silicone mat beneath your cutting board to prevent any slipping while chopping.
